# An Ecosystem that Delivers Security and Convenience

When your smart home devices are integrated, they work in harmony to create an in-home ecosystem that enhances your comfort and convenience. Integrating your smart home devices properly allows you to control all aspects of your smart home seamlessly and effortlessly through a single app.

## Smart from the Start

Security and Automation Simplified

- Automation includes access and control of the following from anywhere :
  - Smart Lights,
  - Remote Controlled Locks,
  - Smart Thermostat,
  - Garage Door,
  - Lutron Electronics Lighting Integrations, and
  - Solar Integrations.
- Interactive Control through Mobile, Web, and Voice Applications (e.g., Amazon Echo and Google Home)
- Video Doorbell Camera (Live View only, if saved clips are desired there are video monitoring packages available as add-ons)
- Digital Automation HUB for Z-wave and other connected options.
- Mobile Application w/ automation services provided at no cost for 3 years

## The Vector Security Smart Home Security Kit includes:

- Qolsys IQ4 – Security & Automation HUB
- Z-Wave Lock (Kwikset, Yale, or Schlage)
- Garage Door Kit
- Alarm.com Smart Thermostat
- Alarm.com Video Doorbell
- Wireless door/window contacts
- Motion sensor
- 1 monitored smoked detector
- Mobile App -- No cost Access for 3years\*

# The Connected Home

## All-in-One Solution

The Connected Home package protects your home and adds next-level convenience and comfort, giving you the option to add video inside and outside your home, manage your energy use remotely, and control access to your home, all from the Vector Security App.

# Essential Home Services

## The Foundation of Security and Automation

Want to protect what you care about most – your family and your home? Our essential home security package is professionally installed security that you can arm and disarm from anywhere and is backed up by award-winning, 24/7 monitoring.

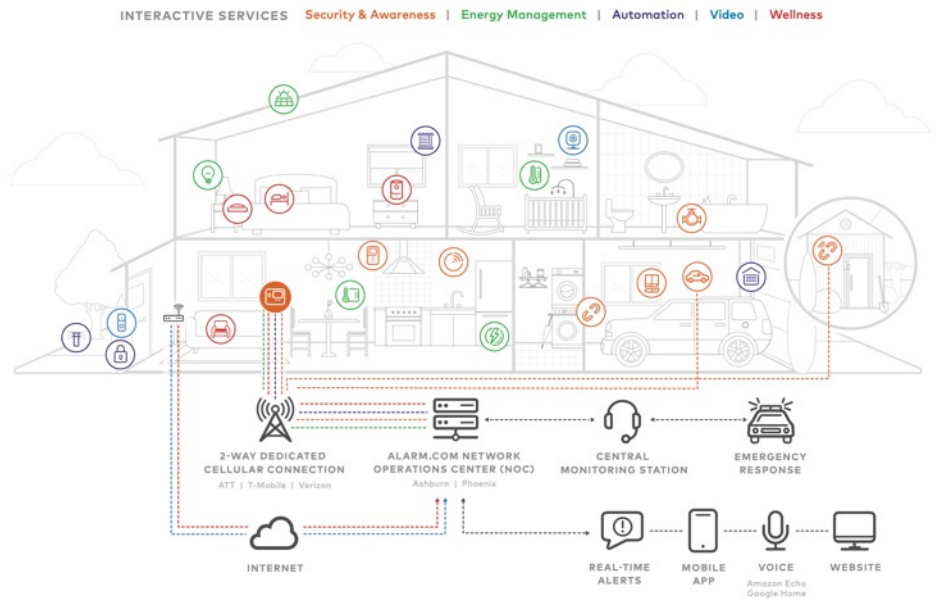

# Connect Your Ecosystem with Smart Home Devices.

Unlike disparate smart home devices that don't "talk" to each other, our devices are procured and professionally installed to provide a truly integrated, whole-home ecosystem.

For example, create schedules so that your alarm system disarms, the lights turn on and the thermostat adjusts to the perfect temperature the moment you arrive home.

And, control it all using the Vector Security mobile app.

## Smart Home Devices

Smart home devices from Vector Security integrate seamlessly to create the ultimate in safety, comfort and convenience in the home. Control every smart device using a single app...the Vector Security mobile app.

### Video Doorbell Camera

With two options to choose from – the original Video Doorbell Camera and the new Wireless Video Doorbell Camera – you can easily keep an eye out for visitors and deliveries from anywhere, making this the perfect addition to your smart home!

### Smart Garage Door Opener

Control your garage door from your smartphone from anywhere when you add a Smart Garage Door Receiver to your family of smart home devices. Works with most major brands of garage door openers made after 1993 with photo eyes.

### Smart Door Lock

Never worry about losing your keys again. Lock and unlock your door using the touchscreen keypad. When included in your Vector Security smart home ecosystem, you can control the lock from the Vector Security mobile app on your smartphone.

## Smart Thermostat

ENERGY STAR® certified Smart Thermostat includes a rich OLED display, advanced diagnostics, and one-touch commands. With the smart thermostat part of your smart home devices ecosystem, you can control the temperature of your home from anywhere using the Vector Security mobile app.

## Outdoor Video Camera

1080p HD video recording and excellent low-light performance make this Wi-Fi outdoor video camera a powerful video solution to integrate with your smart home devices. With an IP66 rating, it's weather-resistant, dust-tight, and ideal for capturing video indoors or outdoors. Receive notifications of video and security incidents on your Vector Security mobile app.

## Motion Sensor

Whether you are asleep at night or away for the day, one of the best ways to know if something is out of the ordinary in your home is an alert sent to your smartphone from our Motion Sensor. Because it detects light up to 30' away in light or dark conditions, you can set it up to alert our central station, alert only your phone, to trigger an alarm, or to simply turn on a light.

# Fire & Life Safety Systems

Your safety is our top priority. When people hear home security, the first thought is often burglar alarms and video cameras. While You'll get those with Vector Security, we also prioritize your life-safety needs with protection from fire and carbon monoxide and wellness solutions that promote independent living.

## Monitored Carbon Monoxide Detector

Carbon monoxide is a colorless, odorless and tasteless gas. If it gets into your house, it presents a real danger to you, your family and your pets. Our Carbon Monoxide Detector is monitored by our central station 24/7, whether your system is armed or not. And because it works with our app, you'll be alerted if something is wrong even if you're not home.

## Monitored Smoke Detector

Most homes already have at least one smoke detector. They are valuable life-safety devices that let you know you may need to evacuate the house and call for help. But what happens when you're not home? How would you know if there's a potential fire until it's too late? Our Smoke Detector is monitored 24/7 by our central station, so if there is a fire and you're not home, you'll know that help is still on the way.

## Professional Fire and CO Protection

Ordinary smoke and carbon monoxide detectors offer limited protection. Vector Security-powered detectors work with your security system to keep you safe and professionally protected, 24/7.

### Notify Emergency Services

If there's a fire or CO leak in your home, your monitoring station will automatically alert first responders even if you can't call for help.

### Get Instant Alerts

An interconnected system detects and alerts you to signs of danger in an instant so you can keep your home and loved ones safe and protected.

### Prevent False Alarms

Left dinner in the oven a bit too long? Not a problem—cancel false fire alarms quickly with the Vector Security app.

## Stop fumes from spreading with Vector Security

When a fire starts, smoke spreads fast. Vector Security protects you by pausing your thermostat automatically when the alarm sounds to prevent toxic fumes from spreading further.

## Everything works together.

A Vector Security system incorporates a range of products that all work together. Each product has its own function, but when everything's connected, it's easy to take action.

### Security & Safety

Our security panels centralize communication channels like Wi-Fi and cellular, with Crash & Smash Protection that contacts your monitoring station even if a burglar destroys the hardware.

### Home Automation

Your products and devices communicate with each other to automate the management of your home, anticipate your household needs, and enhance your comfort and peace of mind.

### Energy Management

Smart thermostats, sensors, lights, outlets, solar monitoring, and more all team up to save energy while letting you customize your environment for max comfort and enjoyment.

### Access Control

Door hardware, smart locks, and garage door controllers connect to ensure that people can get in when you want them to—and stay out when you don't.

### Video Monitoring

Check in or check out with advanced indoor and outdoor video cameras that learn your household habits and feature intelligent analytics that know the difference between people, pets and vehicles, so you get the most critical notifications sent to you.

And, our video doorbells let you see, hear, and do more at your front door.

# Pre-Installation Services

The modern home is more than just a living space. It's a hub of technology, security, and comfort. At Vector Security, we understand the essence of integrating state-of-the-art security and smart home systems seamlessly into the design of new homes. By partnering with home builders, we aim to offer homeowners the chance to experience next-level living, right from the day they step into their new residence. Here's a breakdown of the items and services we can pre-install, ensuring every home is future-proof and primed for a tech-smart era:

## Camera Pre-wire

Planning for the future? We lay down the foundation for homeowners to integrate security cameras whenever they decide, ensuring all essential wiring is in place for easy and hassle-free installations.

## Cable and Data Drops

In an interconnected world, reliable and fast connectivity is paramount. Our team ensures each room is equipped with essential cable and data ports, providing the infrastructure needed for seamless internet and entertainment experiences.

## Clock Outlets

Time is invaluable, and so is its display. With dedicated clock outlets, homeowners can conveniently power wall-mounted clocks, making time-keeping elegant and straightforward.

## Surround Sound

Transport homeowners to a world of crystal-clear audio experiences, whether for a movie night or a calming music session. Our pre-installed surround sound systems ensure that sound quality is immersive and pure.

## Recessed Media Closets

A neat home is a happy home. With our recessed media closets, homeowners can effortlessly manage and store all their media equipment, from game consoles to music systems, in one concealed and organized spot.

## Alarm Services

Safety first! Our alarm systems, when activated, guarantee that the residence remains a fortress against intrusions. With the latest sensors and alarms, your homeowners can rest easy, knowing their sanctuary is protected.

## Smart Home Integration

The future is smart. By pre-integrating smart home capabilities, new homeowners can easily control various aspects of their home – from lighting to temperature – all through a single device. Convenience, efficiency, and a touch of luxury, all bundled into one.

When partnering with Vector Security, home builders can be assured that every service we provide is designed to make daily life more comfortable, more secure, and more in tune with the modern world.
